15% reduction to TODN members for TORONTO session only, \$335.75

Book by February 26th, 2018

Book by March 1st, 2018

Regular Pricing \$495

Imagine your organization continuously growing the value delivered to your customers **AND** increasing efficiency in your organization. *Imagine* your teams discovering the hidden resources in their processes and systems, and finding creative and energizing ways to improve – searching for value rather than waste and deficits. This is truly a more inspiring road towards efficiency, engagement and innovation!

Looking for ways to:

Increase staff engagement and morale?

Inject energy into your quality and efficiency projects?

Explore ways to build upon your strengths?

Then this workshop is for you!

“Strength-Based Lean Six Sigma Thinking” yields fresh insights and remarkable results, maximizing the value across different streams of business, key business processes as well as people management practices.

The Strength-Based LEAN Six Sigma thinking approach shows you how to **identify what is already working efficiently AND generating value**, and then define ways to grow and expand those good practices elsewhere. It combines the rigor of LEAN and the innovation and energy of Appreciative Inquiry.

In this workshop, you will look at processes through a Strength-based ‘lens’:

- The principles of Appreciative Inquiry and other Strength based approaches like Positive Deviance and Solution Focus
- The Strength-based ‘state of mind’ – useful when approaching any change situation
- Reframing typical process challenges and Lean Six Sigma topics - how to look at them in an appreciative inquiring way - the power of asking different questions
- Reframing commonly used quality improvement tools such as 7 wastes, 5S, DMAIC, PDCA, Value Stream Mapping and fishbone analysis, to a strength-based version

Who should attend?

Leaders, change agents, consultants, teams interested in exploring a different approach to their work whether it be continuous improvement, efficiency, transformational change, increasing engagement and exploring innovation.

About Your Instructor, David Shaked

He is the author of the book '**Strength-based Lean Six Sigma. Building positive and engaging business improvement**'. It is the first book to use approaches in business improvement as well as organizational change for optimum organizational performance and improved agility.

He has over twenty years of hands-on experience with organizations such as Johnson & Johnson, Intel, 3M, IBM, NHS UK, Southern Rail, Howard Tenens, Shelter, Deloitte, Carmignac, Lyle & Scott as well as Christchurch and Kingston Universities. He has worked all across Europe, the USA, the Middle East and India. David has delivered Appreciative Inquiry workshops in both the US and in Europe. He offers a strong platform of strength-based approaches to change. They include: Appreciative Inquiry, Solution Focus, Positive Deviance, Positive Psychology and a range of constructive action-focused dialogue approaches.
